I am working on a project and am stuck at the data-handling in Jtree Table. I have a very large data (70MB) in database which have to be listed in that table, it has to work like this: It has to list those data with labels and checkboxes. The checkboxes will have value 0-1 and will have to accept where the value of 0 means unchecked and 1 means checked. I am using hibernate(hbm) as my data base, and i have no idea on how to make this work, any help will be highly appreciated. A: Your tags are a bit out of line. Use ItemSelector and a DefaultTreeModel. See the examples: BTW, TreeSelection will only work with or without TreeTableModel, it will not do what you want. A: I think TreeTableModel will do the trick. Let's assume you're using your own TableModel - the case of using Rows from DataBase would be
